

Amphenol

Advanced Sensors

in collaboration with

Menschen haben Sinne
Systeme haben i2s

Amphenol Advanced Sensors (AAS), headquartered in St. Mary's, Pennsylvania, is a business unit within Amphenol that produces innovative sensor solutions for temperature, pressure, gas and moisture measurement applications.

As part of AAS, Intelligente Sensorsysteme (i2s) has been supporting Amphenol Thermometrics on the recruiting process for this position, which will have a German employment contract and will be located at i2s' office in Dresden.

Reporting directly to the European Technology Manager, you will have a fantastic opportunity to be part of a growing team in the region and you will count on a full support from other regions' colleagues to learn about our products and our project management internal process.

When you join our global engineering team as a Project Manager, you will be responsible for driving growth of the Temperature product line in the European region and for accelerating the pace of the group's diversification and innovation to the next level.

The aim is to set up an intercultural team in Dresden, which will process customer questions in a satisfactory manner, among other tasks. To do this, we need people with relevant Project Management experience who are passionate about identifying and driving a need for change.

From now we are looking for a:

Project Manager (m/f/d)

Essential Responsibilities

- Leading projects from customer inquiry to start of production
- Leading cross-functional, cross-site teams to a successful product launch
- Creates and executes project plans and revises as appropriate to meet changing needs
- Identifies resources needed and assigns individual responsibilities
- Manages day-to-day operational aspects of the project
- Applies and enforces the Custom Product Opportunity (CPO) and New Product Introduction (NPI) methodology and Advanced Product Quality Planning (APQP), where applicable
- Prepares project tollgate reviews for review by business leadership
- Ensures project documents are complete, current and archived appropriately
- Manages the budget for the project (expenses, investment, sales revenue & unit cost)
- Facilitates project team and customer meetings; fosters relationship with customer
- Leads the team through regular status meetings, driving actions to completion
- Drives to resolution items that impact timeliness, budget and quality
- Resolves or escalates issues in a timely manner
- Managing project scope and change control and escalating issues
